Water Safety Tips courtesy of the “Simple Steps Save Lives” Program

1. Staying close, being alert and watching children in and around the pool
   - Never leave a child unattended in a pool or spa and always watch your child when he or she is in or near water
   - Teach children basic water safety tips
   - Keep children away from pool drains, pipes and other openings to avoid entrapments
   - Have a telephone close by when you or your family is using a pool or spa
   - If a child is missing, look for him or her in the pool or spa first
   - Share safety instructions with family, friends and neighbors

2. Learning and practicing water safety skills
   - Learn how to swim and teach your child how to swim
   - Learn to perform CPR on children and adults and update those skills regularly
   - Understand the basics of life-saving so that you can assist in a pool emergency

3. Having appropriate equipment for your pool or spa
   - Install a four-foot or taller fence around the pool and spa and use self-closing and self-latching gates; ask your neighbors to do the same at their pools
   - Install and use a lockable safety cover on your spa.
   - If your house serves as a fourth side of a fence around a pool, install door alarms and always use them. For additional protection, install window guards on windows facing pools or spas.
   - Install pool and gate alarms to alert you when children go near the water
   - Ensure any pool and spa you use has compliant drain covers and ask your pool service provider if you don’t know.
• Maintain pool and spa covers in good working order

• Consider using a surface wave or underwater alarm
